

Listed Property / Structures in North Norfolk

NOTE:

If the property or structure you are looking for is not specifically mentioned in this document, it may still be listed. There are two main reasons why it may not appear on this list:

- **The name or number of the property / structure may have changed since the time of listing.**
- **The property / structure may not be listed in its own right but it could still be listed through its position within the curtilage or grounds of a listed building.**

For a curtilage building to be considered listed, it must satisfy a number of tests:

- 1. It must pre-date the 1st July 1948.*
- 2. In geographical or physical terms, it must be closely related to the principal listed building.*
- 3. It must have been in the same ownership as the principal listed building;
a) at the time of listing (in the case of buildings listed on or after the 1st January 1969 when legislation for curtilage listings was introduced), **or**
b) at the 1st January 1969 (in the case of buildings listed before this date).*
- 4. It must have served an ancillary or supporting function to the main listed building;
a) at the time of listing (again in the case of buildings which were listed on or after the 1st January 1969), **or**
b) at the 1st January 1969 (in the case of buildings listed before this date).*

It is therefore always wise to check with North Norfolk District Council to see whether your property/structure is listed before commencing any works.

North Norfolk District Council's Conservation and Design Section:
