

NNDC Public Hearing Session

Should it not be addressed if a mistake has been made on a Greenfield CAT01? "We may have made a mistake" this was mentioned after the pre-hearing meeting while talking to some officers that attended the meeting on 8-6-2010 at Cromer. After I spoke about Green Open Space or the lack of it in Catfield Village.

- For infrastructure if required for the future
- Which would be perfect at CAT01 (next to the conservation area).
- As there is no where for the very young children, mothers with babies in prams, the old (oap's) disabled or vunable to go in safty for health and social informal recreation.
- The whole local community needs should (we think) have attractive places to live and work.
- With climatechange in mind, so we do not have to travel.
- Open space which make an important contribution to the appearance of an aera in keeping of a broad village not a compressed town.
- CAT01 is the last Green space in Catfield.
